AI GUARDIANS
CHECKLIST

- ☐ Look for inconsistencies like asymmetrical facial features, awkward finger placement, or objects with strange proportions.

- ☐ Check for repetitive or unnatural textures on hair, skin, or clothing

- ☐ Ensure the lighting and shadows match the scene.

- ☐ Be alert for issues like elongated hands, extra fingers or weirdly placed objects.

- ☐ Watch for overly blurred, complex, or nonsensical backgrounds that don't align with the main subject.

- ☐ Look for pixelation, odd color patterns, or unexplained blur in unexpected areas.

- ☐ Text within images is a weak spot for AI; it often appears garbled, nonsensical, or misspelled.

- ☐ Pay attention to the faces — they might look subtly off, with unusual reflections in eyes and strange ear shapes
